The Don't Disturb the Dinosaurs dataset is a large-scale collection of images and annotations for object detection and image segmentation tasks. The dataset was created by researchers at the University of California, Berkeley and the Massachusetts Institute of Technology, and it was released in 2017.

The dataset contains over 100,000 images, each of which is annotated with bounding boxes and segmentation masks for multiple objects. The objects in the dataset include animals, vehicles, furniture, and other everyday objects. The dataset is divided into two subsets: a training set and a test set.

The Don't Disturb the Dinosaurs dataset is a valuable resource for researchers and practitioners in the field of computer vision. The dataset can be used to train and evaluate object detection and image segmentation models. It can also be used to develop new computer vision algorithms and applications.

Size and Content

The Don't Disturb the Dinosaurs dataset is one of the largest publicly available datasets for object detection and image segmentation tasks. The dataset contains over 100,000 images, each of which is annotated with bounding boxes and segmentation masks for multiple objects.

The objects in the dataset include animals, vehicles, furniture, and other everyday objects. The dataset is divided into two subsets: a training set and a test set. The training set contains over 80,000 images, and the test set contains over 20,000 images.

Challenges

The Don't Disturb the Dinosaurs dataset is a challenging dataset for object detection and image segmentation tasks. The dataset contains a large number of small objects, and many of the objects are occluded or truncated. Additionally, the dataset contains a significant amount of noise and clutter.

Despite these challenges, the Don't Disturb the Dinosaurs dataset is a valuable resource for researchers and practitioners in the field of computer vision. The dataset can be used to train and evaluate object detection and image segmentation models. It can also be used to develop new computer vision algorithms and applications.

Applications

The Don't Disturb the Dinosaurs dataset has a wide range of applications in the field of computer vision. The dataset can be used to train and evaluate object detection and image segmentation models. It can also be used to develop new computer vision algorithms and applications.

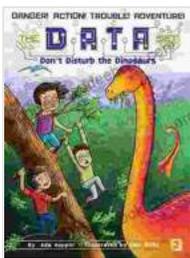

Some of the potential applications of the Don't Disturb the Dinosaurs dataset include:

- Object detection
- Image segmentation
- Scene understanding
- Autonomous driving
- Robotics

The Don't Disturb the Dinosaurs dataset is a valuable resource for researchers and practitioners in the field of computer vision. The dataset is large, challenging, and has a wide range of applications. We encourage researchers and practitioners to use the dataset to develop new computer vision algorithms and applications.
