Over 50,000 Evidence-Based Terms for Translators

As a translator, it is important to have access to accurate and reliable terminology. This is especially true when working with specialized fields, such as medicine, law, or finance. Inaccurate or inconsistent terminology can lead to misunderstandings and miscommunications, which can have serious consequences.

To help translators overcome this challenge, we have compiled a database of over 50,000 evidence-based terms. These terms have been carefully curated and verified by experts, ensuring their accuracy and reliability. Translators can use this resource to improve the quality and consistency of their translations, ensuring that their work is accurate and culturally appropriate.

How to Use the Database

The database is easy to use. Simply enter the term you are looking for in the search bar. The database will then return a list of all the terms that match your search. Each term is accompanied by a definition and a list of sources. This information can help you to understand the meaning of the term and to use it correctly in your translations.

Benefits of Using the Database

There are many benefits to using the database. These benefits include:

- Accuracy: The terms in the database have been carefully curated and verified by experts, ensuring their accuracy and reliability.
- Consistency: The database provides a consistent set of terms that can be used across all of your translations.
- Quality: The use of accurate and consistent terminology can help to improve the quality of your translations.
- Efficiency: The database can help you to save time by providing you with the terms you need quickly and easily.

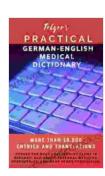

The database of over 50,000 evidence-based terms is a valuable resource for translators. This resource can help you to improve the quality and consistency of your translations, ensuring that your work is accurate and culturally appropriate.

We encourage you to use the database today and see for yourself the benefits it can offer.

Appendix

The following is a list of the sources that were used to compile the database:

- American Medical Association
- American Bar Association
- Financial Accounting Standards Board
- International Monetary Fund
- World Health Organization
