21st century skills are a set of skills that are necessary for success in the 21st century workplace and beyond. These skills include:

- Critical thinking
- Problem solving
- Creativity
- Collaboration

- Communication
- Information literacy
- Media literacy
- Technology literacy

Principals play a vital role in developing 21st century skills in students. They can create a learning environment that fosters these skills and provide opportunities for students to practice them. Principals can also model 21st century skills for their students and staff.

Here are some practical strategies that principals can use to develop 21st century skills in students:

- **Create a learning environment that is rich in opportunities for critical thinking and problem solving.** This can be done by providing students with open-ended questions and tasks, encouraging them to ask questions, and giving them opportunities to work on projects that require them to think creatively and solve problems.
- **Provide opportunities for students to collaborate and communicate.** This can be done by having students work in groups, participate in class discussions, and give presentations.
- **Teach students how to access and evaluate information.** This can be done by providing students with instruction on how to use the library and the internet, and by teaching them how to evaluate the credibility of information.
- **Teach students how to use technology effectively.** This can be done by providing students with access to technology and by teaching

them how to use it for learning and productivity.

- **Model 21st century skills for your students and staff.** This can be done by demonstrating critical thinking, problem solving, creativity, collaboration, communication, information literacy, media literacy, and technology literacy in your own work.

By developing 21st century skills in students, principals can prepare them for success in the 21st century workplace and beyond. These skills will help students to think critically, solve problems, communicate effectively, and use technology effectively. They will also help students to be creative, collaborative, and information literate.

Resources for Principals

Here are some resources that principals can use to develop 21st century skills in students:

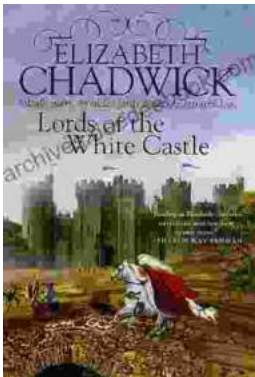

- Partnership for 21st Century Skills
- Edutopia: 21st Century Skills
- ISTE Standards for Students
- National Association of Secondary School Principals: 21st Century Skills

By using these resources, principals can create a learning environment that fosters 21st century skills in students and prepare them for success in the 21st century workplace and beyond.
